

Adrián Muñoz Atienza

Computer Science Student | Software Engineering | Human-Centered AI & Behavioral Technology

Suzhou, Jiangsu, China | hiatienza.github.io | linkedin.com/in/hiatienza | github.com/HiAtienza

PROFESSIONAL SUMMARY

Year 3 BSc Information and Computing Science student at Xi'an Jiaotong-Liverpool University, graduating in July 2028. Developing as a Software Engineer across full-stack web, Android and applied-AI products, with a growing focus on Human-Centered AI, Behavioral Technology and Human-AI Interaction. Experience includes supervised HCI research, independent product development, automated testing, multicultural customer service and tutoring. Seeking software engineering internships and suitable early-career roles.

EXPERIENCE

Undergraduate Researcher | XJTLU Summer Undergraduate Research Fellowship

Jul 2026 - Present | Suzhou, China

- Developed the VIDEO-RESCUE browser prototype as one of two student team members in supervised HCI research on AI-powered transcript coordination for search and rescue.
- Supported study design, participant recruitment, research sessions and data analysis for interfaces that help teams interpret distributed field information.

Software Developer - Independent Projects | Independent Projects

Jul 2026 - Present | Suzhou, China

- Built CyberMastery, an authenticated full-stack learning prototype with structured skill evidence, deterministic mastery logic, retention rechecks, transfer activities and unit, integration and browser test coverage.
- Building LifeMap, a local-first Android prototype using Kotlin and Jetpack Compose with persistent preferences, responsive layouts, accessibility support and an event-driven live wallpaper.

Bellperson | Marriott International

Jul 2024 - Sep 2024 | Madrid, Spain | Seasonal

- Supported guests in a multicultural environment, coordinating requests with clear communication, teamwork and practical problem solving under time pressure.

Freelance Mathematics Tutor

2023 - 2024 | Madrid, Spain

- Explained mathematical concepts through structured, learner-specific explanations and practice, adapting the next step through active listening and feedback.

SELECTED PROJECTS

VIDEO-RESCUE | React, TypeScript, Express, SQLite, LiveKit/WebRTC

Developed a browser-based coordination prototype for search-and-rescue scenarios combining maps, live media, captions, durable event logging, operator tasking and photo evidence. Designed evidence-linked AI correlation support that exposes supporting events, confidence, unknowns and suggested next actions while keeping decisions with human operators. Research/prototyping system, not an operational rescue platform.

CyberMastery | Next.js, TypeScript, PostgreSQL, Prisma

Built an authenticated HTTP Fundamentals lifecycle spanning guided learning, independent assessment, structured skill evidence, deterministic mastery scoring, retention rechecks and transfer activities. Separated the learning domain from UI, persistence and authentication, with unit, integration and browser test coverage. Current scope uses static protocol simulations.

LifeMap | Kotlin, Jetpack Compose, Preferences DataStore

Building a local-first Android prototype for visualising time and goals with a shared calendar render model, persistence, responsive layouts, accessibility descriptions, automated verification and an event-driven live wallpaper.

EDUCATION

BSc Information and Computing Science | Xi'an Jiaotong-Liverpool University

Sep 2025 - Jul 2028 | Current Year 3

Relevant study: software engineering, data structures and algorithms, databases, artificial intelligence, networking, probability and statistics, and human-centered computing.

Software Engineering Studies | U-TAD

Sep 2022 - Aug 2025 | Madrid, Spain

Previous English-taught studies before transfer to XJTLU. No U-TAD degree award claimed.

TECHNICAL SKILLS

Core: Software Engineering, Product Development, TypeScript, Automated Testing

Languages and frameworks: TypeScript, React, Next.js, Kotlin, Android Development, Jetpack Compose, Java, Python

Data and testing: PostgreSQL, Prisma, SQLite, SQL, Playwright, Unit Testing, Integration Testing

Human-centered direction: Human-Centered AI, Human-AI Interaction, Human-Computer Interaction, User-Centered Design, Learning Technology, Behavioral Technology (emerging)

Engineering: REST APIs, Authentication, Git, Accessibility, Local-First Architecture, Applied AI

LANGUAGES

Spanish - Native or bilingual proficiency | English - Full professional proficiency | Mandarin Chinese - Elementary proficiency
