Adrián Muñoz Atienza

Computer Science Student | Android & Web Products | Software Engineering

Suzhou, Jiangsu, China | hiatienza.github.io | linkedin.com/in/hiatienza | github.com/HiAtienza

PROFESSIONAL SUMMARY

Year 3 Computer Science student at XJTLU, building useful Android and web products with attention to user experience, local data and testing. Developed LockIn and Setline with Codex-assisted implementation and Google Play internal releases; contribute to supervised human-AI coordination research. Seeking software engineering and product-development internships in Suzhou, Shanghai, Spain, the EU or compatible remote roles. Expected graduation: July 2028.

EXPERIENCE

Undergraduate Researcher | XJTLU Summer Undergraduate Research Fellowship
Jul 2026 - Present | Suzhou, China

- Developed VIDEO-RESCUE prototype work as one of two student team members in supervised HCI research, connecting field reports, live transcripts, media and a shared map while preserving human decision responsibility.
- Supported study design, recruitment, sessions and analysis. Data collection is complete; fuller analysis of preliminary qualitative feedback remains ongoing.

Software Developer | Independent Projects
Jul 2026 - Present | Suzhou, China

- Define product and UX requirements for LockIn and Setline; develop with Codex assistance, local persistence, automated tests and signed Google Play internal releases.

Bellperson | Marriott International
Jul 2024 - Sep 2024 | Madrid, Spain | Seasonal

- Coordinated guest requests in a multicultural environment through clear communication, teamwork and practical problem solving under time pressure.

Freelance Mathematics Tutor
2023 - 2024 | Madrid, Spain

- Adapted mathematical explanations and practice to individual learners through active listening and feedback.

SELECTED PROJECTS

LockIn | Kotlin, Jetpack Compose, DataStore, Canvas
Developed a modular Android planning wallpaper with calendars, tasks, habits, focus and study. Shared previews and layout priorities preserve class details; calendar sources are read-only. Prepared signed AAB releases for Google Play internal testing (0.1.11).

VIDEO-RESCUE | React, TypeScript, Express, SQLite, LiveKit/WebRTC
Research coordination prototype combining reports, media, live transcripts, a human-visible map and AI assistance that keeps unknowns visible. Assignment, receipt confirmation and export support follow-up and review. Human operators retain decisions; direct AI map access and navigation remain future work. Not an operational rescue platform.

Setline | JavaScript, TypeScript, Capacitor, IndexedDB
Built an Android strength-training app with custom routines, actual-rep logging and SVG estimated-1RM charts. Separated templates from session history; added local backup recovery and native rest alerts. Internal Play release 1.4.0, with isolated physical Android QA.

EDUCATION

BSc Information and Computing Science | Xi'an Jiaotong-Liverpool University
Sep 2025 - Expected Jul 2028 | Current Year 3 | Suzhou, China
Relevant study: software engineering, algorithms, databases, artificial intelligence and human-centered computing.

Foundational Coursework in Software Engineering | U-TAD
Sep 2022 - Aug 2025 | Madrid, Spain
English-taught coursework, including an XJTLU exchange in 2024-2025. Transferred to the XJTLU BSc.

TECHNICAL SKILLS

Languages and platforms: Kotlin, JavaScript, TypeScript, Java, Python, SQL; Android, Jetpack Compose, React, Next.js
Data and quality: IndexedDB, DataStore, PostgreSQL, Prisma, SQLite, Git, Playwright, unit/integration/browser testing
Engineering: REST APIs, authentication, accessibility, local-first architecture, technical documentation
Growing focus: Human-Centered AI, Human-AI Interaction, HCI, User-Centered Design, Behavioral Technology

LANGUAGES

Spanish - Native | English - Full professional proficiency | Mandarin Chinese - Elementary proficiency
