PROFILE

Year 3 Computer Science student at XJTLU. Expected graduation: July 2028. I build useful Android and web products and care about their user experience. LockIn, Setline and supervised human-AI research.

TECHNICAL SKILLS

CORE

Software Engineering · Product Development · TypeScript · Automated Testing

WEB

TypeScript · React · Next.js · REST APIs · Authentication

MOBILE

Kotlin · Jetpack Compose · DataStore · Capacitor · Android

DATA & TOOLS

IndexedDB · SQLite · Git · Playwright · Device QA

RESEARCH DIRECTION

Human-Centered AI · Human-AI Interaction · HCI · Behavioral Technology

LANGUAGES

Spanish
Native

English
Full professional

Mandarin Chinese
Elementary

AVAILABILITY

Software engineering and product-development internships. Suzhou, Shanghai, Spain, the EU or compatible remote roles. Open to relocation within these regions.

Adrián Muñoz Atienza

COMPUTER SCIENCE STUDENT | ANDROID & WEB PRODUCTS | SOFTWARE ENGINEERING

EXPERIENCE & SUPERVISED RESEARCH

Undergraduate Researcher
Jul 2026 - Present

XJTLU Summer Undergraduate Research Fellowship | Suzhou, China

- Developed VIDEO-RESCUE prototype work as one of two student team members, connecting reports, transcripts, media and maps with human-controlled AI assistance.
- Supported study design, recruitment, sessions and analysis. Data collection complete; fuller analysis of preliminary feedback ongoing.

Software Developer
Jul 2026 - Present

Independent Projects | Suzhou, China

- Build LockIn and Setline with Codex-assisted implementation, local persistence, clear input workflows and automated testing.

Bellperson
Jul 2024 - Sep 2024

Marriott International | Madrid, Spain | Seasonal

- Coordinated guest requests through clear communication, teamwork and practical problem solving in a multicultural environment.

Freelance Mathematics Tutor
2023 - 2024

Madrid, Spain

- Adapted mathematical explanations and practice to individual learners through active listening and feedback.

SELECTED PROJECTS

1. LockIn

Developed a modular Android wallpaper for calendars, tasks, habits, focus and study. Shared previews and layout priorities preserve class details. Read-only calendars; signed AAB releases for Google Play internal testing (0.1.11).

Kotlin · Compose · DataStore · Canvas · Microsoft Graph

2. VIDEO-RESCUE

Supervised research prototype combining reports, media, transcripts, a shared map and AI support with visible unknowns. Human operators keep decisions. Direct AI map access/navigation remains future work; not operational rescue.

React · TypeScript · Express · SQLite · LiveKit/WebRTC

3. Setline

Built custom routines, actual-rep logging and SVG estimated-1RM charts. Independent templates and history, local backups and native rest alerts. Google Play internal release 1.4.0; isolated physical Android QA.

JavaScript · TypeScript · Capacitor · IndexedDB

EDUCATION

BSc Information and Computing Science
Xi'an Jiaotong-Liverpool University
Sep 2025 - Expected Jul 2028 · Year 3

Software engineering, algorithms, databases, AI and human-centered computing.

Foundational Software Engineering Coursework
U-TAD
Sep 2022 - Aug 2025

English-taught coursework, including XJTLU exchange in 2024-2025. Transferred to XJTLU.
