Adrián Muñoz Atienza

Seeking a software engineering internship in applied AI

Year 3 Computer Science student at XJTLU · Human-AI interaction

Suzhou, China · hiatienza.github.io · linkedin.com/in/hiatienza · github.com/HiAtienza

SELECTED PROJECTS

VIDEO-RESCUE · Supervised research prototype at XJTLU

- Built a report-matching tool that compares observations from different searchers and drops AI suggestions unless they cite a supplied report. A coordinator can open the source before assigning a task.
- Implemented an offline queue that retries each photo upload with its original report ID. In a storage test, writing the same report twice produced one mission record.

LockIn · Android lock-screen planner

Used one layout calculation for the preview and the wallpaper so students can see which tasks will fit. Checked the applied wallpaper on a OnePlus and distributed a signed build through Google Play internal testing.

Setline · Offline workout log

Designed workout sessions to keep their own targets. In a regression test, a two-set session retains both sets after its template is changed to eight sets and deleted.

EXPERIENCE

Undergraduate Researcher · XJTLU Summer Undergraduate Research Fellowship

July 2026 - present · Suzhou, China

One of two student researchers studying how people use AI to coordinate simulated searches. Contributed to study design, recruitment, sessions and analysis. Data collection is complete and analysis is ongoing.

Independent Software Developer · Android products

July 2026 - present · Suzhou, China

Set requirements and UX priorities for both Android apps and guided Codex-assisted development through internal releases.

Earlier roles in Madrid · Freelance mathematics tutor (2023-2024) and seasonal bellperson at Marriott International (July-September 2024).

EDUCATION

BSc Information and Computing Science · Xi'an Jiaotong-Liverpool University

Year 3 · Expected graduation July 2028 · Suzhou, China

Software Engineering coursework · U-TAD, Madrid

English-taught study, 2022-2025. Transferred to XJTLU.

SKILLS AND LANGUAGES

Engineering TypeScript, React, Kotlin, Jetpack Compose, SQLite, IndexedDB and Playwright.

Languages Spanish (native), English (full professional proficiency), Mandarin Chinese (elementary).
