

# Adrián Muñoz Atienza

Computer Science Student | Product-Focused Software Engineering | Android, Full-Stack Web & Applied AI

Suzhou, China · Portfolio: <https://hiatienza.github.io> · LinkedIn: [linkedin.com/in/inmunozatienza](https://www.linkedin.com/in/inmunozatienza) · GitHub: [github.com/HiAtienza](https://github.com/HiAtienza)

## Profile

Year 3 BSc Information and Computing Science student at Xi'an Jiaotong-Liverpool University building human-centred Android, full-stack web and applied-AI products. Interested in product-focused software engineering internships and full-time early-career roles.

## Education

**BSc Information and Computing Science — Xi'an Jiaotong-Liverpool University (XJTLU), Suzhou, China**

2025 – 2028 · Expected graduation: July 2028 · Current Year 3

**Previous Software Engineering studies — U-TAD, Madrid, Spain**

2022 – 2025

English-taught studies before transfer to XJTLU; no degree award claimed.

## Experience

**Undergraduate Researcher — XJTLU Summer Undergraduate Research Fellowship**

July 2026 – present

One of two student team members contributing to supervised research on AI-powered transcript coordination for search-and-rescue scenarios.

- Develop browser-prototype work that connects reports, maps, live media, tasks and evidence-linked suggestions.
- Support study design, participant recruitment, research sessions and analysis; human operators retain decision responsibility in the research prototype.

**Independent Product Development**

2026 – present

Build CyberMastery, a full-stack cybersecurity-learning prototype, and LifeMap, a private local-first Android time-and-goal visualisation prototype.

**Bellperson — Marriott International, Madrid**

July 2024 – September 2024 · Seasonal

Provided multicultural customer service, resolving guest enquiries through clear communication and practical follow-through.

## Selected Projects

**VIDEO-RESCUE — supervised research prototype**

Browser-based coordination support for search-and-rescue research, connecting reports, maps, live media, tasks and evidence-linked AI suggestions. Not an operational rescue platform.

**CyberMastery — full-stack learning prototype**

Authenticated HTTP Fundamentals vertical slice with guided learning, assessment, structured evidence, retention rechecks and transfer activities; source remains private.

**LifeMap — local-first Android prototype**

Kotlin and Jetpack Compose prototype that visualises time and goals as calendar grids with local Preferences DataStore persistence.

## Technical Skills

**Languages:** TypeScript, JavaScript, Java, Python, Kotlin, SQL

**Web & backend:** React, Next.js, REST APIs, PostgreSQL, Prisma, SQLite, authentication

**Android:** Android Development, Jetpack Compose, Preferences DataStore, accessibility

**Quality:** Git, automated testing, unit testing, integration testing, browser testing, Playwright, technical documentation

## Languages

Spanish (Native) · English (Fluent) · Mandarin Chinese (Basic)

Availability: now for internships or full-time early-career roles. Target locations: Suzhou, Shanghai, Spain, European Union and compatible remote roles. Open to on-site, hybrid and remote work; willing to relocate within target regions.
