Product-focused Software Engineering · Android, Full-Stack Web & Applied AI

Suzhou, China Portfolio LinkedIn GitHub

EDUCATION

2025 – 2028 Expected Jul 2028	BSc Information and Computing Science Xi'an Jiaotong-Liverpool University (XJTLU), Suzhou, China · Current Year 3 student.
2022 – 2025	Previous Software Engineering studies U-TAD, Madrid, Spain · English-taught study before transfer to XJTLU; no degree award claimed.

EXPERIENCE

Jul 2026 – present	Undergraduate Researcher · XJTLU Summer Undergraduate Research Fellowship One of two student team members contributing to supervised research on AI-powered transcript coordination for search-and-rescue scenarios. Developed browser-prototype work and supported study design, participant recruitment, research sessions and analysis.
2026 – present	Independent Product Development Building CyberMastery, a full-stack cybersecurity-learning prototype, and LifeMap, a private local-first Android time-and-goal visualisation prototype.
Jul – Sep 2024	Bellperson · Marriott International, Madrid Seasonal multicultural customer service role, resolving guest enquiries through clear communication and practical follow-through.

SELECTED PROJECTS

VIDEO-RESCUE · supervised research prototype Browser-based coordination support connecting reports, maps, live media, tasks and evidence-linked AI suggestions while human operators retain decision responsibility.
CyberMastery · full-stack learning prototype Authenticated HTTP Fundamentals learning lifecycle with guided learning, assessment, structured evidence, retention rechecks and transfer activities.
LifeMap · Android prototype Local-first time-and-goal visualisation using Kotlin, Jetpack Compose and Preferences DataStore.

Available now for software engineering internships and full-time early-career roles; open to Suzhou, Shanghai, Spain, the European Union and compatible remote roles.
