PROFILE

Year 3 BSc Information and Computing Science student at XJTLU, graduating in July 2028. Developing as a Software Engineer with a growing focus on Human-Centered AI, Behavioral Technology and Human-AI Interaction.

TECHNICAL SKILLS

CORE

Software Engineering · Product Development · TypeScript · Automated Testing

WEB

TypeScript · React · Next.js · REST APIs · Authentication

MOBILE

Kotlin · Android Development · Jetpack Compose

DATA & TOOLS

PostgreSQL · Prisma · SQLite · Git · Playwright

HUMAN-CENTERED DIRECTION

Human-Centered AI · Human-AI Interaction · HCI · Behavioral Technology

LANGUAGES

Spanish
Native or bilingual

English
Full professional

Mandarin Chinese
Elementary

EXPERIENCE & SUPERVISED RESEARCH

Undergraduate Researcher

Jul 2026 - Present

XJTLU Summer Undergraduate Research Fellowship | Suzhou, China

- Developed the VIDEO-RESCUE browser prototype as one of two student team members in supervised HCI research on AI-assisted coordination for search and rescue.
- Supported study design, participant recruitment, research sessions and data analysis while keeping decisions with human operators.

Software Developer - Independent Projects

Jul 2026 - Present

Independent Projects | Suzhou, China

- Built CyberMastery, an authenticated full-stack learning prototype with structured skill evidence, deterministic mastery logic, retention rechecks and test coverage.
- Building LifeMap, a local-first Android prototype with Kotlin, Jetpack Compose, persistent preferences, accessibility support and a live wallpaper.

Bellperson

Jul 2024 - Sep 2024

Marriott International | Madrid, Spain | Seasonal

- Supported guests in a multicultural environment, coordinating requests with clear communication, teamwork and practical problem solving under time pressure.

Freelance Mathematics Tutor

2023 - 2024

Madrid, Spain

- Adapted explanations and practice to individual learners, strengthening teaching, active listening and problem-solving skills.

SELECTED PROJECTS

1. VIDEO-RESCUE

Research coordination prototype connecting maps, live media, durable events, operator tasks and evidence-linked AI support. Designed for human review, not operational rescue.

React · TypeScript · Express · SQLite · LiveKit/WebRTC

2. CyberMastery

Authenticated HTTP Fundamentals lifecycle spanning guided learning, independent assessment, structured evidence, retention and transfer. Scope uses static protocol simulations.

Next.js · TypeScript · PostgreSQL · Prisma · Testing

3. LifeMap

Local-first Android prototype for visualising time and goals, with shared rendering, persistence, responsive layouts, accessibility and an event-driven live wallpaper.

Kotlin · Jetpack Compose · DataStore · Android

EDUCATION

BSc Information and Computing Science

Xi'an Jiaotong-Liverpool University

Sep 2025 - Jul 2028 · Year 3

Software engineering, algorithms, databases, AI and human-centered computing.

Software Engineering Studies

U-TAD

Sep 2022 - Aug 2025

Previous English-taught studies before transfer to XJTLU. No U-TAD degree award claimed.
